Care for canvas

HOW TO REMOVE DIRT AND STAINS

Canvas is a durable material that lasts over time, but it is important to remove dirt or stains as soon as they appear. Avoid using strong detergent as they may bleach the material.

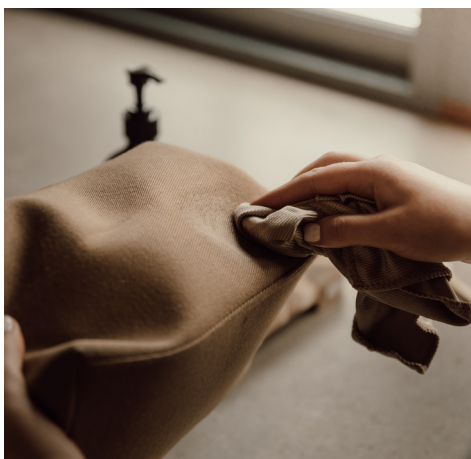

YOU NEED:

- A soft toothbrush.
- A cloth.
- Water.
- Washing-up liquid.

STEP 1

Add washing-up liquid and water to the brush and work in circular motions.

STEP 2

Use the cloth to wipe thoroughly with water, but avoid soaking the material. Air dry in a well-ventilated area.
