HOW TO POLISH COPPER

Copper oxidises and darkens over time. Here's how to easily polish your copperware to regain its shine. Make sure to read the instructions for your copper polish carefully. Different brands require different methods.

YOU NEED:
- Copper polish.
- A soft cloth.

STEP 1
Apply a generous amount of copper polish to cover the whole area.

STEP 2
Leave it on for a couple of minutes.

STEP 3
Use a clean cloth to polish in circular motions until shiny.

STEP 4
Handwash it to make sure all of the copper polish is gone. Now your copperware can be used again.
